# INTRODUCTION

iFortune Coin (IFC) is a revolutionary digital currency designed to power a comprehensive ecosystem that includes iFortune Token (IFT), iFortuneX (IFX), and the Fortune Scan blockchain. Built on a robust foundation of blockchain technology, iFortune Coin aims to redefine the way users interact with digital finance, offering a seamless, secure, and scalable environment for trading, staking, and decentralized finance (DeFi) solutions.

The iFortune ecosystem is crafted to empower users with financial freedom and independence by bridging traditional financial systems with decentralized digital economies. By leveraging the power of blockchain, iFortune Coin ensures transparency, security, and efficiency in every transaction, making it a reliable choice for both novice and experienced cryptocurrency enthusiasts.

Through strategic integration with iFortune Token (IFT) and iFortuneX (IFX), the iFortune Coin ecosystem offers a holistic financial experience, encompassing decentralized trading, staking rewards, and innovative earning opportunities. By providing lower transaction fees, enhanced scalability, and a decentralized governance model, iFortune Coin is set to become a leading player in the world of digital finance.

As a digital currency with its own blockchain, iFortune Coin is more than just a cryptocurrency—it is a gateway to a decentralized future, empowering users to take control of their financial destinies while fostering a transparent, secure, and inclusive digital economy.

# MISSION

Our mission is to redefine the future of digital finance by building a comprehensive and secure blockchain ecosystem that empowers individuals and businesses worldwide. We aim to bridge the gap between traditional financial systems and the world of digital assets, providing users with transparent, decentralized, and efficient financial solutions. By leveraging cutting-edge blockchain technology, we are committed to creating a platform that enhances financial freedom, fosters economic growth, and encourages innovation.

# VISION

We envision a world where financial freedom is accessible to everyone, regardless of geographic location or economic status. Our vision is to be a global leader in decentralized finance by offering a robust, scalable, and user-friendly blockchain infrastructure. Through the Fortune Scan blockchain, we aspire to revolutionize the way people interact with digital assets, enabling faster transactions, lower fees, and enhanced security.

# ECOSYSTEM OVERVIEW

The iFortune ecosystem is a comprehensive and interconnected blockchain environment designed to provide users with diverse financial opportunities and seamless digital experiences. It is strategically built around three key components: **iFortune Token (IFT)**, **iFortuneX (IFX)**, and **iFortune Coin (IFC)**, each playing a vital role within the ecosystem. These elements are unified through the **Fortune Scan** blockchain, which delivers high security, scalability, and decentralized transaction processing.

## **iFortune Token (IFT):**

Operating on the Binance Smart Chain, IFT is designed to power transactions, reward users, and drive engagement within the ecosystem. It also supports staking and governance, allowing users to participate in decision-making processes.

## **iFortuneX (IFX):**

As the native token of the iFortuneX decentralized exchange, IFX enhances trading experiences by providing liquidity, reducing trading fees, and offering governance rights, ensuring community-driven growth.

## **iFortune Coin (IFC):**

Built on its own blockchain (Fortune Scan), IFC serves as the primary cryptocurrency for secure and fast peer-to-peer transactions. It offers low transaction fees and supports smart contract deployment, enabling a wide range of decentralized applications.

These components are seamlessly integrated to create a dynamic and versatile ecosystem that supports decentralized finance, staking opportunities, automated trading solutions, and community-driven governance. With Fortune Scan's advanced technology, iFortune aims to deliver a scalable, secure, and decentralized platform, driving mass adoption of blockchain technology while providing users with financial freedom and flexibility.

# FORTUNE SCAN

Fortune Scan is a revolutionary Layer 1 blockchain built on the Ethereum Virtual Machine (EVM), designed to redefine decentralized applications, digital assets, and financial solutions. It provides a secure, scalable, and transparent platform, empowering developers to build decentralized applications (dApps) and launch tokens with ease. By leveraging state-of-the-art blockchain technology, Fortune Scan fosters innovation while maintaining high standards of security and decentralization.

## Relation Between Fortune Scan and iFortune Coin

Fortune Scan and iFortune Coin (IFC) are intricately linked, with Fortune Scan serving as the native blockchain powering all transactions involving IFC. As the core of the iFortune ecosystem, Fortune Scan ensures secure, transparent, and scalable transactions, enhancing the usability and value of iFortune Coin.

iFortune Coin acts as the primary medium of exchange for transactions, staking, and governance within the Fortune Scan network. Users can stake IFC to participate in network consensus, earning rewards for validating transactions and maintaining network security. Additionally, iFortune Coin plays a vital role in decentralized governance, allowing holders to vote on proposals impacting the development and direction of Fortune Scan.

This seamless integration between Fortune Scan and iFortune Coin creates a powerful and scalable ecosystem, driving the future of decentralized finance and digital innovation.

fortune scan

BLOCKCHAIN

# KEY FEATURES

Fortune Scan represents the next generation of blockchain technology, prioritizing security, scalability, and decentralization.

## **EVM Compatibility:**

Built on the Ethereum Virtual Machine (EVM), Fortune Scan allows seamless porting of smart contracts from other EVM networks, providing developers with extensive tools and resources.

## **Layer 1 Architecture:**

As a Layer 1 blockchain, Fortune Scan directly manages consensus, transaction validation, and data storage, enhancing security, decentralization, and efficiency.

## **Proof of Stake (PoS) Consensus:**

It uses a PoS mechanism where validators are chosen based on IFC staked, ensuring energy efficiency and high security.

## **High Scalability and Speed:**

Capable of processing up to 60,000 transactions per second, Fortune Scan eliminates network congestion and ensures rapid processing.

## **Low Transaction Fees:**

Offering cost-effective transactions, Fortune Scan promotes mass adoption and expands dApp use cases.

## **Smart Contract Deployment:**

Developers can easily deploy smart contracts for dApps, DeFi solutions, and NFTs, thanks to its EVM compatibility.

## **Ecosystem Growth and Token Deployment:**

It supports token creation and deployment, empowering developers to build and expand the iFortune ecosystem.

## **Interoperability:**

Fortune Scan seamlessly integrates with other blockchains, enabling cross-chain collaboration and innovation.

# FORTUNE MATRIX

**Fortune Matrix** is an integral part of the iFortune ecosystem, providing a unique blockchain-based investment platform that allows users to stake their assets and earn in dollars, regardless of the **iFortune Coin (IFC)** price. This innovative approach ensures stability and predictability in earnings, making it an attractive option for investors seeking consistent returns.

**Fortune Matrix** operates on the **Fortune Scan** blockchain, leveraging smart contracts for secure and transparent transactions. It allows users to participate in various staking packages, earn rewards through a multi-level referral system, and benefit from the unique **iFortune Token (IFT)** and **iFortune Coin (IFC)** conversion mechanism.

## Blockchain Conversion and Staking

The staking packages are measured in dollars, ensuring that the price of IFC does not impact the earnings. This means that users earn a fixed amount in dollars, providing a stable investment experience.

### Conversion Structure

**50% USDT + 25% IFT + 25% IFX**

Users can purchase staking packages directly from the Fortune Machine App.

All IFT and IFX tokens used in the Fortune Matrix Plan are burned, reducing the supply of iFortune Token and potentially increasing its value over time

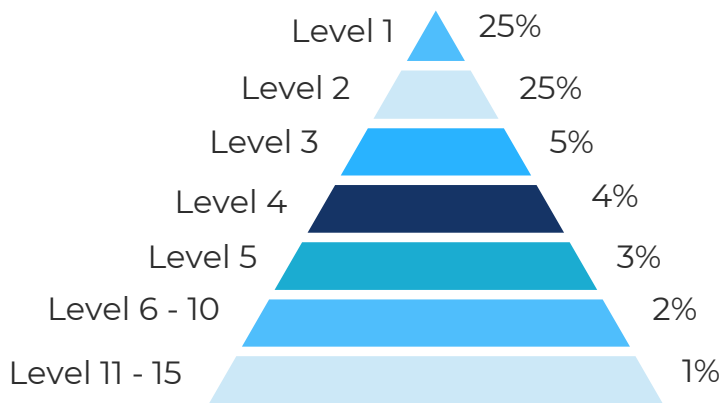

# STAKING PACKAGES

Fortune Matrix offers two primary staking packages:

Standard ID		Legendary ID	
Minimum Activation	\$200	Minimum Activation	\$200
Earnings	2.5x Dollars	Earnings	3x Dollars
Daily Return	0.5% in Dollars	Daily Return	0.5% in Dollars
Monthly Return	15% in Dollars	Monthly Return	15% in Dollars

## Referral and Reward System

To unlock the **Level 2 - 25%** reward and **3x income**, users need to achieve a minimum business of **\$3000** with **5 direct referrals** within **30 days** of **ID activation**. Otherwise, they receive **10%** and **2.5x income**.

# FORTUNE MATRIX IN APP

Fortune Matrix is fully integrated into the Fortune Machine App, providing users with a seamless and convenient experience for deposits, staking, and withdrawals.

Deposit	Withdrawal
<b>Minimum Activation Package: \$200</b>	<b>Minimum Withdrawal Limit : \$10</b>
If the price of 1 IFT and 1 IFX is \$1, the deposit structure is: <b>100 USDT + 50 IFT + 50 IFX = \$200</b>	If the price of 1 iFortune Coin (IFC) is \$1, then: <b>\$10 x \$1 = 10 IFC</b>
All IFT and IFX tokens used in the staking plan are burned, reducing the overall supply and contributing to price stability.	All the iFortune Coins withdrawn from the Fortune Matrix Plan are added to the circulating supply, supporting stable price growth.

## Live Price Conversion

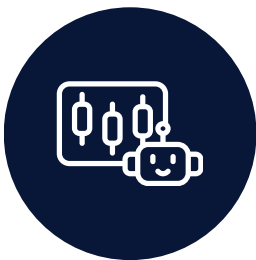

Deposit			Withdrawal		
Dollars	Price	IFT/IFX	Dollars	Price	IFC
\$100	\$1	50	\$100	\$1	100
\$100	\$2	25	\$100	\$2	50
\$100	\$0.5	100	\$100	\$0.5	200

# FORTUNE FLASH TRADE BOT

Fortune Flash Trade Bot is an innovative AI-powered trading solution within the iFortune ecosystem, designed to maximize user profits through automated trading strategies. It offers a seamless trading experience by integrating with Binance API, ensuring that your funds remain secure within your own account. The bot operates 24/7, executing trades automatically, and provides multiple income streams, making it a powerful tool for both novice and experienced traders.

Fortune Flash Trade Bot stands out by offering three distinct types of income streams within a single subscription package:

Bot Trading

Exchange Trading Fees

Arbitrage Trading

## Subscription Packages and Profit Capping

The Fortune Flash Trade Bot offers a flexible subscription model that caters to a wide range of investors. The details of the subscription package are as follows:

**\$100**      **1 Year**

Subscription Cost

Validity

**30 IFC + 30 IFT + 30 IFX**

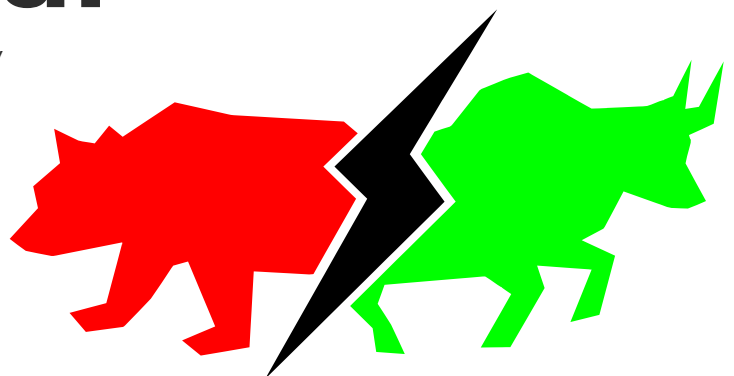

tokens required for activation

**\$300 + \$20 Gas Fees**

Minimum Deposit

**\$20,000 per year**

Profit Capping

iFortune Coin | 10

# BENEFITS

**24/7 Automatic AI Bot Trading:** Executes trades round the clock, capitalizing on market opportunities without requiring manual intervention.

**Exchange Trading Fees Income:** Users earn a share of the exchange trading fees, creating an additional passive income stream.

**Arbitrage Trading Benefit:** Utilizes arbitrage strategies to profit from price differences across exchanges.

**Funds Security:** Funds are securely held within the user's own Binance account, minimizing risks associated with third-party custody.

**Binance API Integration:** Users can link their Binance account via API, ensuring a seamless trading experience.

**Flexible Profit Options:** Users can choose to either withdraw profits in USDT or reinvest by holding in Bot Trading.

**No Loss Assurance:** The bot strategically holds top cryptocurrencies during market downturns, ensuring no loss and potential profit upon market recovery.

**Customizable Strategy Grid:** Traders can set their own trading strategy grid, allowing for personalized risk management and profit maximization.

# EARNING

**10-20 Automatic Trades Daily:** Ensures consistent profit opportunities by leveraging market volatility.

**Level Earnings from Subscription Referral:** Users can earn referral commissions by inviting others to join the platform.

**10%-50% Earnings from Bot Trading:** Dynamic earnings based on market conditions and trading volume.

**Exchange Trading Fees Income:** A portion of the trading fees generated on the exchange is distributed among users.

**Arbitrage Trading Earnings:** Capitalizes on price discrepancies across exchanges for risk-free profits.

**Long-term Top Cryptocurrency Holding Profit:** While there is no loss, the bot strategically holds top cryptocurrencies, ensuring potential profit over the long term.

# TOKENOMICS

Token Chain

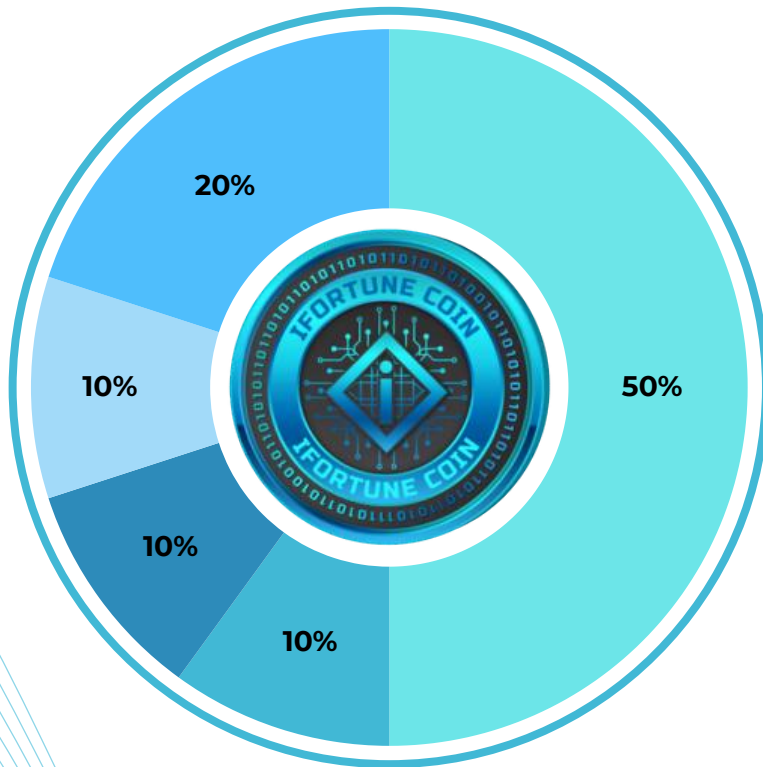

**21 Million**

Total Supply

**BEP-20**

## Token Distribution

- 50% Rewards
- 20% Exchange Liquidity
- 10% ICO & DCO
- 10% Server and Listing
- 10% Projects

# Utility & Burning

No coin can survive and get stable without utility in the future. To get stable growth in the price of iFortune Coin, Company has designed 2 utility projects to utilize & burn iFortune Coin.

- Fortune Flash Trade
- Fortune Matrix

Whatever tokens will be utilized in these projects will be burnt from circulating supply which will decrease the quantity from total limited supply 21 Million and help the token to grow with stability in shorter time.
